-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

1. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

2. The abstract of the disclosure is objected to because the abstract includes the term "means" in line 6. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 15-18 and 21-24 are rejected under 35 U.S.C. 102(b) as being anticipated by Roth (US 3,871,760).

Regarding claims 15 and 16, Roth discloses "an image window (Fig. 1, ref.# 1, 3) which is arranged in the recording beam path of the movie camera and having a

spacing window (Fig. 1, ref.# 9) which is arranged on a gripper platform (Fig. 1, ref.# 6), between whose mutually facing film planes a film channel or film gap is formed through which the movie film (Fig. 3, ref.# 19) is moved by means of a film transport mechanism (Fig. 1, ref.# 5; column 3, lines 33-34), wherein the gripper platform" and/or "the spacing window is supported on the image window (column 2, lines 44-47)."

Regarding claim 17, Roth discloses "wherein the gripper platform and/or the spacing window are/is supported on at least one contact surface of the image window via a plurality of projections which are in the form of spacers (Fig. 1, ref.# 10; column 2, lines 44-47)."

Regarding claim 18, Roth discloses "wherein the projections are corner points of a geometric figure." (column 3, lines 2-5)

Regarding claim, 21, Roth discloses "wherein the gripper platform (Fig. 1, ref.# 6) and/or the spacing window (Fig. 1, ref.# 9) are/is supported on the at least one contact surface of the image window (Fig. 1, ref.# 1, 3) via in each case one projection (Fig. 1, ref.# 10), which is preferably in the form of a web or is flat." (Figure 1 shows the gripper platform, the spacing window, the image window and the projection as being flat."

Regarding claim 22, Roth discloses "wherein the gripper platform (Fig. 1, ref.# 6) and/or the spacing window (Fig. 1, ref.# 9) are/is supported on the at least one contact surface of the image window (Fig. 1, ref.# 1, 3) via in each case at least two projections (Fig. 2, ref.# 10), which are arranged on each side of the gripper platform and/or of the spacing window (Fig. 2, ref.# 10 – shows projections on either side of spacing window 9)."

Regarding claim 23, Roth discloses "wherein the projections (Fig. 1, ref.# 10) are supported on the film plane of the image window (Fig. 1, ref.# 1, 3)."

Regarding claim 24, Roth discloses "wherein the spacing window (Fig. 1, ref.# 9) is sprung (Fig. 1, ref.# 7) with respect to the gripper platform (Fig. 1, ref.# 6) which holds the spacing window."

Allowable Subject Matter

5. Claims 19, 20 and 25-28 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: Beauviala (US 4,744,651) discloses "a film guide for a movie camera having an image window which is arranged in the recording beam path of the movie camera and having a spacing window which is arranged on a gripper platform, between whose mutually facing film planes a film channel or film gap is formed through which the movie film is moved by a means of film transport mechanism."
